Date and time	Wednesday 5 June, 11:20 am - 12 pm
Agenda item	SBI 5(b): Modalities of the UAE dialogue on implementing the global stocktake outcomes, referred to in paragraph 97 of decision 1/CMA.5
Session	1st information consultation
Location	Plenary New York
Notes taken by:	Matti Goldberg, Woodwell Climate Research Center

CO-FACILITATORS:
- CMA 5 decision: UAE Dialogue on Implementing the GST outcomes; operationalized from CMA 6, and concluded by CMA 10, and SBI to develop modalities at SB 60 for the dialogue for consideration by CMA 6.
- Views on: expectations for this item, what to achieve here and at CMA 6?

NORWAY:
- The GST is comprehensive [..];
- "We will follow up everywhere" and "it informs everything we do" = need a space that builds the bridge between Dubai and the 2nd GST = gather all inputs to an "oversight space" on all the issues = have an annual dialogue informed by a report that summarized what's happening with the GST mandates across different tracks, and reflect on progress made to build the bridge to the second GST;

SWITZERLAND (EIG):
- GST success hinges on implementation;
- What do we need? Keep track of overall progress on the GST recommendations (track actions and resources available); IEA and IRENA provide tracking, but we need broader things; also need a space to share experience in GST implementation; make sure the institutions are ready to implement the GST (clarify which institutions under the UNFCCC will support the implementation); mandate secretariat to report by end of 2025 to keep track of progress on GST mandates; UAE Dialogue: space to exchange on implementation; map which processes and institutions work on which mandates; put an emphasis on areas that do not have an institutional anchoring (mapping would help with this); all elements must be covered;
- Modalities: one dialogue per year at SBs; inputs: report from institutions; output: annual decision and agenda item; NPSs should be involved;

EU:
- Dialogue: Article 2 in its entirety; all dialogues should integrate human rights and gender and IPCC reports and BAS; all CMA activities should be mobilized; this dialogue is a tool to take stock of progress; aim: update and enhance action and support for implementing GST outcomes; modalities: enable contribution to GST 2 (Norway bridge); 186: WPs and CBs to integrate GST outcomes in their work = operationalize this invitation through follow-up (JT WP, UAE WP, Lima WP on Gender, etc. = regular reports to the UAE Dialogue);
- Consider how HL Champions and Marrakech P-ship could contribute to GST implementation; also IEA and IRENA reports; the areas that have a home should inform the UAE Dialogue;
- Submissions on ???

RUSSIA:
- Focus on main topics of GST (m, a, MoI, int. coop.); thematic discussions + World Café and things; every year; HL event after each dialogue to inform future actions; action events at preCOP or such; involve all stakeholders;

BRAZIL (Grupo Sur):

- 197-198 + links with 187: we see two tracks: 1. 187 = 187 annual dialogue - how the GST outcomes inform the next NDCs, and int coop to do so; 2. 197-198: means of implementation = need to develop modalities for this here; MoI enable the action;

AGN:

- Finance & MoI; we're not short of ambition - we have that in NDCs (conditional and unconditional); Dialogue should focus on availability and pred. of finance for NDCs and NAPs, and deliver recommendations on the targets of CMA outcomes;
- 187: annual dialogue, 186: invites other bodies to take up GST outcomes; avoid duplications; focus on ambition and restoring trust through finance;

ZAF (Harald):

- Concerned about the approach some are taking; 197 and 198 are clearly part of this, and focus should be on those issues; we need a constructive approach; in other places we cherry-picked paragraphs (???)
- This is a year working towards a finance COP in Baku, so we need to focus here on MoI; 197-198;
- 186 is clear with an invitation to CBs to take on the outcomes of the GST;

USA:

- 1/CMA.5 refers to Parties and NPSs; need to understand where we stand collectives;
- MoI should be part of the discussion, but 197 and 198 do not focus only on finance - we need follow-up across the board;
- 197: very narrow focus, and we can broader this by focusing on all the elements
- Dialogue is under SB Chairs, held in-session, consider which CBs are doing different parts of 1/CMA.5; Swiss proposal: mapping of existing processes working on GST - very valuable
- Norway: papers for each dialogues would help; each CB working on GST things could report; could here data related to implementation;
- Also consider where some GST outcomes are not being taken up by our process, and recommend where that could happen;

CHINA:

- Focus on finance; context of mandate is essential; the dialogue comes from ???, so it should focus on finance; "if you want everything you'll get nothing"; mitigation dialogue and some others are operating at the same time;
- Content: focus on how to fill the gaps related to implementing GST outcomes; so it should ??? In relation to other dialogues;

MALAWI (LDCs):

- UAED should help implement GST outcomes; opportunity to look at gaps for achieving 1.5, gaps in adaptation, loss and damage, and gaps in means of implementation;
- UAED: deep discussion to address these gaps to implement NDCs, NAPs and tech. plans; MoI, inc finance is needed for this; this is linked to the NCQG; look at the whole landscape of outcomes;

MALDIVES (AOSIS):

- First GST: critical for 1.5; but will be in vain if recommendations are not implemented; so we want a robust follow-up mechanism for this; identify gaps in implementation and make arrangements to stay on track;
- UAED should focus on implementation of all GST outcomes, not just one; need to focus on finance and there's merit to this; all aspects must be considered, but finance is critical; finance underpins all actions under the climate regime;
- Identify timeline, inputs and outputs;

JAPAN:

- Scope: implement GST outcome (paras 97-98); cover entire GST outcome; remove duplication with other dialogues; we can exchange views etc.; first dialogue at SB 62, with scope of the entire themes of the GST; timeline overlaps with implementation of 2nd GST, so we must be consistent with the process of that second GST;

SAUDI ARABIA (LMDC):

- Will submit full intervention
- Scope: you can also not want everything in one dialogue; cannot achieve everything in a single dialogue; uses of UAED: developing countries are preparing new NDCs and are require MoI; this dialogue will start after COP 29, and will be a perfect space to follow-up on the implementation of things; focus should be on financial support from developed to developing;
- Modalities: any call to secretariat to map things seems more relevant to streamlining, and less relevant to this dialogue - we do not support this - this is supposed to be a very specific dialogue; inputs: countries can provide information on their efforts; outputs: biennial reports on technical tracks and ministerial dialogues; this dialogue is not in a silo of vacuum;

CHAIR:

- Next consultation: 6/6, 10 am, room TB announced;
